

# Kaydee 1500

Backyard shop, warehouse, or construction site, the Kaydee knockdown lift goes wherever the job is. The boom hook rotates 360 degrees, making it easy to pick up, load and reposition objects.

## Kaddy

For extra ease and portability, all parts of the Kaydee lifts can be moved in the wheeled Kaddy, which is designed for easy handling by one person, and narrow enough to fit through a 20" opening.

## Strength

Our jacks are engineered to exacting specifications, with slow release valves, pressure relief valves and chrome plated rams.
